Greeting

ATMKOREA Co., Ltd is the company has provided the solution to customers for superior and High technology in their product with ATMKOREA's UV adhesives product.

We are doing our best in our current situation which is based on high quality with resource effectiveness. It is only step to forward to our future and it's our great pleasure that we're leader of UV adhesives technology in the world.

History

- 2011. 01. Established ATMKOREA Co., Ltd.
- 02. Approved Venture Company
- 05. Certified the R&D center by KOITA
- 10. Received the Encouragement award from contest by SMBA

- 2012. 05. Expanded and relocated the head office and plant
- 06. Contracted to developed Ink material for Backlight of LCD(SMBA)
- 06. Contracted to developed Titanium oxide for solar cell (AURI)
- 12. Certified ISO 9001, 14001

- 2013. 11. Contracted to develop dye absorbing M/C for DSSC(SMBA)
- 12. Received the Encouragement award from Venter enterprises exhibition and contest by SMBA

Product information

UV Sealant

ATMKOREA – “The Best Provider for UV Sealant Technology”

• UV Sealant

LCD Glass sealant for Display(LCD, OLED)
Etching Industry

· Commercial Type (UV Lamp, LED)

• Product Characteristics

- High adhesive
- Good uniformity for coating thickness
- Good visibility
- Easy remove after etching process
- Good reliability
- Verity color and viscosity

ITEM	SPECIFICATION
Color	Blue
Specific Gravity	0.8~1.2
Viscosity (cp)	500~15,000

We can supply a verity color and viscosity of UV adhesives according to customer requests

• Product Description

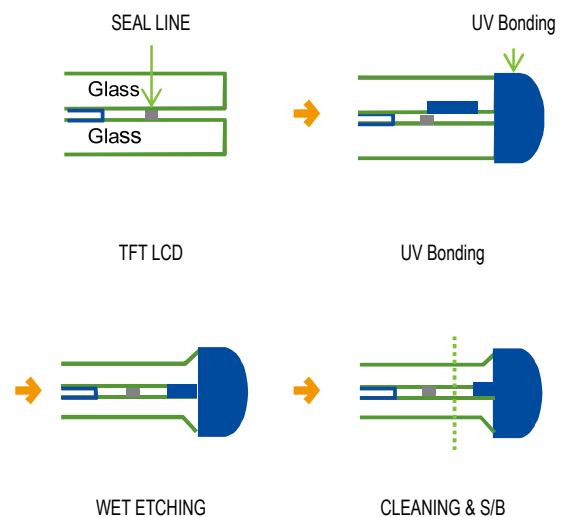

ATMKOREA Co.,Ltd's UV Sealant are being used to bond for bond for LCD glass etching Industry.

Specially, It have good reliability for chemicals etching process.

Also, It can control the verity color and viscosity according to customer requests.

• Application

TFT-LCD Glass slimming process

Product information

S/K protect coating resin

ATMKOREA – “The Best Provider for UV Sealant Technology”

•S/K protect coating resin

To protect scratch of glass surface for Display Industry

· Commercial Type (UV Lamp, LED)

•Product Characteristics

- Good uniformity for coating thickness
- Good visibility
- Easy remove after screen printing
- Good reliability
- Good leveling

ITEM	SPECIFICATION
Color	Blue
Specific Gravity	1.25~1.50
Viscosity (cp)	6,000~30,000

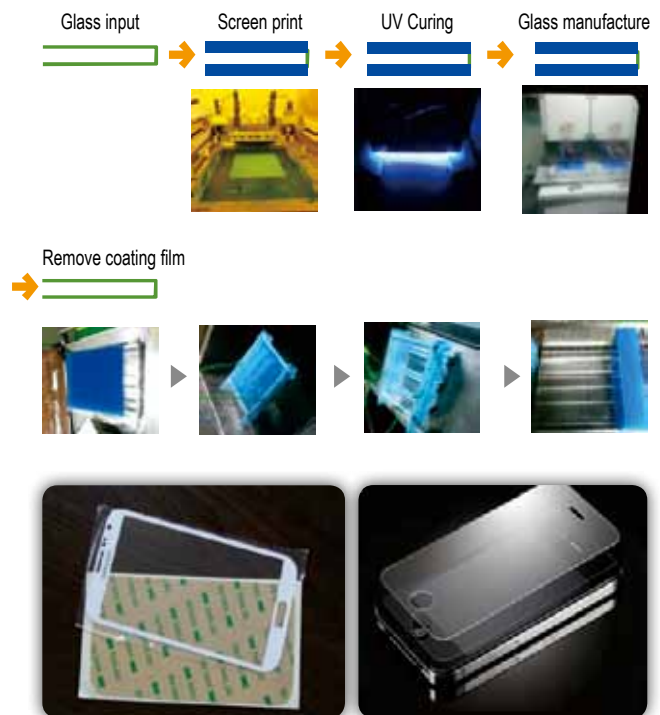

We can supply a variety color and viscosity of UV Resin according to customer requests

•Product Description

ATMKOREA Co.,Ltd's UV Resin are being used to coating for glass manufacturing Industry. Specially, It have good reliability for glass manufacture process. Also, it can control the variety color and viscosity according to customer requests.

•Application

UV resin coating process on glass

Product information

UV Adhesive

ATMKOREA – “The Best Provider for UV Sealant Technology”

• UV Adhesive

Electric wire Adhesives are used to connect for flexible display circuit industry

· Commercial Type (UV Lamp, LED)

• Product Characteristics

- High adhesive
- Good uniformity for coating thickness
- Good reliability
- Verity color and viscosity

ITEM	SPECIFICATION
Color	Clear
Specific Gravity	0.8~1.2
Viscosity (cp)	50~1,000

We can supply verity color and viscosity of UV adhesives according to customer requests

• Product Description

ATMKOREA Co.,Ltd's UV Adhesives are being used to bond for flexible display circuit industry. Specially, It have good reliability for chemicals etching process.

Also, It can control the verity color and viscosity according to customer requests.

• Application

Flexible electric wire bonding process
